

TouchNet U.Commerce 9.6 Updates

Feature	Description	Current View (Prior to October 16, 2026)	New View (As of October 16, 2026)	Benefits	Impacted Users																								
New Report – uStore Settings	Marketplace administrators and merchant managers can now generate a uStore Settings report that consolidates current store configuration settings into a single report. The report can be viewed in the browser or exported to include General Settings, Payment Method Settings, Shipping Settings, and Promotions Setting options to help identify configuration inconsistencies across stores.	▼ Marketplace Reports ▼ Marketplace Revenue By Merchant Revenue By Accounting Code Revenue By Payment Type By Attendant By Product Taxes User Roles Transaction Details Operations Center Activity ► Merchants ► Stores ► uPay Sites ▼ Marketplace Reports ► Marketplace ▼ Merchants ▼ UM Training Merchant UM Training Merchant Revenue Revenue By Payment Type UM Training Merchant By Attendant UM Training Merchant By Product Taxes User Roles Transaction Details Operations Center Activity Product Inventory Product Settings ► Stores ► uPay Sites	▼ Marketplace Reports ▼ Marketplace Revenue By Merchant Revenue By Accounting Code Revenue By Payment Type By Attendant By Product Taxes User Roles Transaction Details Operations Center Activity uStores Settings uPay Site Settings ► Merchants ► Stores ► uPay Sites ▼ Marketplace Reports ► Marketplace ▼ Merchants ▼ UM Training Merchant UM Training Merchant Revenue Revenue By Payment Type UM Training Merchant By Attendant UM Training Merchant By Product Taxes User Roles Transaction Details Operations Center Activity Product Inventory Product Settings uStores Settings uPay Site Settings ► Stores ► uPay Sites Marketplace uStore Settings Report This report allows the user to review various uStores settings. Merchant ID	Merchant Name	Store ID	Store Name	Archived	Web Status	POS Status	Single Store	Viewable in Mail	Mode When Viewable	Perform GL Updates	Tax Method
0	8039924355 Training	1	Your Student Event	No	Enabled	Disabled	Yes	Yes	SINGLE	Yes	Service - United States

Simplifies configuration reviews; helps identify inconsistent settings across stores; reduces the need to review each configuration area separately.

• Administrators

• Merchant Managers

Feature	Description	Current View (Prior to October 16, 2026)	New View (As of October 16, 2026)	Benefits	Impacted Users
New Report – uPay Site Settings	Marketplace administrators and merchant managers can now generate a uPay Site Settings report that provides a consolidated view of current site configuration settings. The report can be viewed online or exported for review of site configurations, payment methods, and POS settings.		 	Makes site-configuration reviews more efficient; supports comparison and validation of uPay settings; helps identify configuration inconsistencies.	- Administrators - Merchant Managers
Delete Or Disable Promotions Without Archiving	Promotion management has been enhanced to provide additional flexibility for the following: - Promotions that have never been used can now be permanently deleted and the promotion code reused. - Existing promotions can now be disabled without being archived. - Disabled promotions remain visible within Marketplace administration but cannot be redeemed until re-enabled. - Disabled promotions can be reactivated and updated when needed.			Provides greater control over promotion lifecycles; permits reuse of unused promotion codes; prevents disabled promotions from being redeemed without permanently removing them.	- Administrators - Store Managers - Store Clerks

Feature	Description	Current View (Prior to October 16, 2026)	New View (As of October 16, 2026)	Benefits	Impacted Users
Marketplace Report Listings Now Display in Alphabetical Order	Merchant names, uStore names, and uPay site names now display in alphabetical order throughout the Marketplace menu areas, making it easier to locate specific merchants, stores, and sites.	N/A	N/A	Makes merchants, stores, and sites easier to locate; improves navigation when working with longer lists; supports faster report and menu selection.	• Administrators • Merchant Managers • Merchant Accountants • Store Managers • Store Clerks • Site Managers • Payment Clerks
Delete Store Categories Without Manually Removing Products	Administrators can now delete store categories without first removing all associated products. Products are automatically unlinked from the category and reassigned to Store Home when appropriate.			Reduces manual cleanup; makes category maintenance faster; helps avoid products remaining tied to a category that is being removed.	• Administrators • Store Managers • Store Clerks
Vega Editor Enhancements	We have updated the Vega editor and increased character limits for several HTML-enabled fields. Fields previously limited to 500 characters now support up to 1,000 characters. Additional Vega editor enhancements include support for Cut, Copy, Delete, Undo, Redo, Tables, Special Characters, Nested Lists, and Line Height options.			Provides more space for descriptions, messages, and copyright content; expands editing and formatting options; improves content-maintenance flexibility across Marketplace, uStores, and uPay.	• Administrators • Store Managers • Store Clerks • Site Managers

Feature	Description	Current View (Prior to October 16, 2026)	New View (As of October 16, 2026)	Benefits	Impacted Users
Removed Support for Legacy Mobile Printers	Support for the following end-of-life mobile printers has been removed from MPOS: - Epson TM-P60i - Epson TM-P60ii - Blue Bamboo P25	N/A	N/A	Eliminates reliance on listed end-of-life printer models and clarifies that those devices are no longer supported for MPOS printing.	- Administrators - POS Attendants
Removed Barcode Scanning from Mpos	Barcode scanning functionality has been removed from MPOS Mobile and Desktop applications, including related barcode-scanning user interface elements and workflows.			Simplifies MPOS by removing a discontinued workflow; makes it clear that item processing can no longer depend on barcode scanning in Mobile or Desktop applications.	- Administrators - Store Managers - Store Clerks - POS Attendants
