

Duo Multi-Factor Authentication (MFA): The Duo Mobile App on Palm

The Duo Mobile application makes it easy to quickly generate login passcodes, even without an Internet connection or cell service.

Compatible Platforms: While we don't officially support Palm devices, you can use this app to log in to Duo. Duo Mobile runs on WebOS 1.4.5 and greater.

Passcodes

Just tap “**Generate Passcode**” to get a one-time passcode for login. This works *anywhere*, even in places where you don't have an Internet connection or can't get cell service.

Activating Duo Mobile

Duo Mobile has to be activated to link it to your account. During the setup process you'll get a text message with a link in it. Just tap the link to activate the application.

If you get a new phone and need to re-activate Duo Mobile, contact your administrator and have him or her send you a new activation link.

Note: Duo Mobile for Palm can currently only be activated for one account at a time.
