Game Consoles

What?
Game consoles are supported at the University of Miami within the Residential Colleges, Lakeside Village, and University Village. To connect a game console to the UM network, you will need to register its Media Access Control (MAC) address with UM which will then be automatically linked to your CaneID. Please refer to “How to Connect” for information on how to find your MAC address and register it. It is recommended that you use an Ethernet (wired) connection, when available, for those gaming consoles which have an Ethernet connection.

Where?
Game consoles are supported at the University of Miami via the wired CaneNet network within the Residential Colleges, University Village, and Lakeside Village (living rooms only), and via the wireless network, CaneGames, within the Residential Colleges, University Village, and Lakeside Village, University Center, and Shalala Student Center.

Links to instructions for finding your MAC address on common gaming devices are listed below. Once you obtain your MAC address, you will need to apply for CaneNet and Wireless Access through the Network Device Registration Portal.

- **Network Settings (wireless)**
  - SSID: CaneGames
  - Visible: No
  - Encryption Type: Open Network (no encryption)

How to Connect

Listed below are links to instructions for a few popular devices. Once you have obtained the MAC address of your system, you must register it via the Network Device Registration Portal in order to use it on the network.

- **PS3: Wired + Wireless**

- **PS4: Wired + Wireless**

- **XBOX ONE: Wired + Wireless**
  - Please note that your MAC address is displayed on the “Change settings” screen under the Advanced section.

- **Wii: Wired + Wireless**
  - Display MAC Address: [http://en-americas-support.nintendo.com/app/answers/detail/a_id/2715](http://en-americas-support.nintendo.com/app/answers/detail/a_id/2715)

- **WiiU: Wired + Wireless**
  - Display MAC Address: [http://en-americas-support.nintendo.com/app/answers/detail/a_id/1721/~/howto-find-the-mac-address](http://en-americas-support.nintendo.com/app/answers/detail/a_id/1721/~/howto-find-the-mac-address)

- **Nintendo DS: Wireless**
  - Display MAC Address: [http://en-americas-support.nintendo.com/app/answers/detail/a_id/206/~/how-to-find-the-mac-address](http://en-americas-support.nintendo.com/app/answers/detail/a_id/206/~/how-to-find-the-mac-address)

- **PSVita: Wireless**
  - Display MAC Address: From the Vita Home Screen, tap the Settings application and then tap Start. Swipe up on the screen to scroll down to the System option, and then tap the System option.

- **Nintendo Switch: Wireless**
  - Display MAC Address: From the Home Screen, tap on “System Settings.” Use the Joystick on the left to scroll down until you see “Internet”. Under Connection Status, look for the “System MAC Address.”

Please note that for streaming, the University recommends using the wired connection when available.
How to Connect (cont’d)

Registering through the Network Device Registration Portal
You can register for CaneNet wired and CaneGames wireless access through the Network Device Registration Portal. This portal is currently only accessible while on campus. Please use your CaneID and password to login. Follow these steps to apply for access:
1. Go to the Network Device Registration Portal and login with your valid CaneID and password.
2. After logging in, on the “Manage Devices” page click on the “Create” button to add a new device.
3. Please fill in the name of the device, (something that you will recognize), and the MAC address (refer to “Finding The Adapter Address” above).
4. Read the University’s policies and select the box agreeing to abide by the University’s policies.
5. Click on “Create Device” to register your device.
6. Repeat steps 2 through 5 for all MAC addresses.

Connecting the Game Console to the network
Links to instructions for connecting to the Network on common gaming devices are listed below. Please note that you need to disconnect and reconnect your system, or reboot it, after registering your MAC addresses before attempting to connect your device to the network.
