How to Set SecureCanes Wireless Network to Not Auto-Join

This is to guide you on how to configure your wireless device to not connect to the SecureCanes wireless network automatically. By doing so, you will need to manually select the SecureCanes network on your device when you are working and/or have a need to connect to the SecureCanes network. (Note: These instructions are not exhaustive and do not cover all types of configurations.)

How to Set SecureCanes Wireless Network to Not Auto-Join

iOS (iPhone / iPad)

1. Tap on the settings icon on your home screen.
2. On the Settings screen, tap on WiFi.
3. Tap on the arrow next to the SecureCanes SSID on the list.
4. Tap on the Auto-Join at the top, and make sure that it is greyed out.

Android

1. Tap on the settings icon on your home screen.
2. Various Android versions will have slightly different nomenclature; please look for “Wireless & Networks” or “Connections.” Then, tap on the Wi-Fi.
3. Scroll down the list of networks until you find the SecureCanes network.
4. Press and hold that network, or select the “Settings” icon on the right, and de-select “Auto reConnect.”

Mac OS X

1. Click on the Apple logo on the top left corner of your screen.
2. In the drop down menu, click System Preferences.
3. Click on Network.
4. On the left hand panel, select Wi-Fi.
5. Click on Advanced.
6. Find the SecureCanes network in the list of Preferred Networks and un-check the “Auto-Join” checkbox.
7. Click on Ok and then Apply to apply the changes.

Windows 10

1. Click on the Windows menu and click on the WiFi icon.
2. Select the SecureCanes network, and uncheck the “Connect Automatically” checkbox.

Chrome OS

1. Click on the WiFi icon on the bottom right and then click on the Settings gear.
2. Select the Network field listed and then select “Known Networks.”
3. Select the SecureCanes network on the list.
4. De-select “Automatically connect to this network.”
